## STATEMENT OF OBJECTS AND REASONS

The Energy Conservation Act, 2001 was enacted, in March, 2002, to provide for efficient use of energy and its conservation and for the matters connected therewith or incidental thereto. The said Act provides for statutory measures to establish statutory authority by the name of Bureau of Energy Efficiency (Bureau) and confer upon the Central Government, State Government and the Bureau certain powers to enforce the said measures for efficient use of energy and its conservation.

2. The Energy Conservation Act, 2001 (the Act) provides for the legal framework and institutional arrangements for embarking on an energy efficiency drive, which, *inter alia*, includes to (a) establish the Bureau by merging existing Energy Management Centre to effectively co-ordinate with designated consumers and agencies for performing such functions and exercise such powers which may be necessary for efficient use of energy and its conservation; (b) confer power upon the Central Government to specify norms for processes and energy consumption standards, etc., to enforce efficient use of energy and its conservation; (c) confer power upon the State Governments for enforcing the provisions of the Act; (d) establish a Fund called the Energy Conservation Fund separately by the Central Government and State Governments; (e) impose penalties in case of contravention of the provisions of the Act; and (f) prescribe the procedure for adjudication of the penalties and appeal to the Supreme Court.

3. The efficient use of energy and its conservation has been engaging the attention of the Central Government for quite some time. As a measure to provide for efficient use of energy and its conservation, the Energy Conservation Act, 2001 was enacted and the Bureau of Energy Efficiency under the said Act has been taking measures for conservation of energy. The said Act was enacted as an enabling in nature so as to provide for more measures from a future date after infrastructure and institutional mechanism are set in place. Now, the infrastructure and institutional mechanism are in place and the Bureau of Energy Efficiency has started discharging its functions for taking measures for conservation of energy. A need has been felt to make more provisions in the aforesaid Act to undertake effective measures for conservation of energy which, *inter alia*, include the following, namely:—

(i) confer power upon the Bureau of Energy Efficiency to appoint its officers and employees instead of by the Central Government being done at present;

(ii) power to give accreditation to energy auditors as well as energy audit firms who are in the business of energy auditing;

(iii) certification procedure for energy managers and energy auditors under the Act;

(iv) conduct of national examination by the Bureau of Energy Efficiency for capacity building and strengthening of services in the field of energy conservation;

(v) empower the Central Government to issue energy savings certificate to the designated consumers whose energy consumption is less than the prescribed norms and enable the designated consumers whose energy consumption is more than the prescribed norms to purchase the energy savings certificate to comply with the norms;

(vi) levy of additional penalty for failure to comply with the provisions of clause (n) of section 14 which shall not be less than the price of every metric ton of oil equivalent of energy, prescribed under the Act, that is in excess of the prescribed norms;

(vii) provide for the Appellate Tribunal established under the Electricity Act, 2003, as also the Appellate Tribunal to hear appeals against the orders of the adjudicating officers, or the Central Government or the State Government or any other authority under the provisions of the Act.

4. The Bill seeks to achieve the above objects.

#### MEMORANDUM REGARDING DELEGATED LEGISLATION

Sub-clause (ii) of clause 5 of the Bill seeks to amend clause (p) of sub-section (2) of section 13 of the Energy Conservation Act, 2001 so as to confer power upon the Bureau of Energy Efficiency (Bureau) to specify, by regulations, the qualifications Criteria and conditions subject to which a person may be accredited as an energy auditor and procedure for such accreditation.

2. Clause 7 of the Bill seeks to insert two new sections 14A and 14B so as to confer power upon the Central Government to prescribe, by rules, the procedure for issue of energy savings certificate to the designated consumers; and the value of metric ton of oil equivalent of energy consumed.

3. The matters in respect of which said rules or regulations may be made are matters of procedure and administrative detail and it is not practicable to provide for them in the proposed legislation itself. The delegation of legislative power is, therefore, of a normal character.
